Are the consumers of Meralco double-billed for transmission?

MANILA, Feb. 15 (PNA)—The Meralco consumers who pay for the transmission of electricity are being double-billed for the same service, according to a report by a committee of the House of Representatives.

The committee, headed by Rep. Jose P. Sison, said in a report that it found that Meralco is charging consumers for the transmission of electricity twice. First, it charges them for the transmission of electricity from the power plants to the substations, and then it charges them again for the transmission of electricity from the substations to the homes and businesses.

The committee said that this is an unfair practice and that it should be stopped. It recommended that the government should regulate the transmission charges and that Meralco should be required to provide electricity to consumers at a reasonable price.

The committee also said that it found that Meralco is charging consumers for the transmission of electricity at a rate that is higher than the rate charged by other utility companies. It recommended that the government should set a maximum rate for the transmission of electricity and that Meralco should be required to comply with this rate.

The committee said that it will continue to monitor the transmission charges and that it will report back to the House of Representatives if it finds any further evidence of double-billing.

The Philippine President's protest is better than that

MANILA, Feb. 15 (PNA)—The Philippine President's protest against the United States' decision to withdraw its troops from Vietnam is a better one than that of the United States, according to a columnist in the Philippine Daily Inquirer.

The columnist, who wrote under the name "The Editor," said that the United States' decision to withdraw its troops from Vietnam was a mistake. He said that the United States should have continued to fight in Vietnam until it had defeated the North Vietnamese.

The columnist said that the Philippine President's protest was a better one because it was a direct and honest expression of the Philippine people's opinion. He said that the United States' protest was a weak and ineffective one because it was a mere statement of opinion without any action to back it up.

Western hostages rescued in Baghdad

Baghdad, Iraq (UPI) — U.S. and British troops rescued three Western hostages from a building in Baghdad on Tuesday, ending a three-day standoff that had threatened to escalate into a full-scale assault on the city.

The hostages, two Americans and one British citizen, were freed after a series of negotiations between the U.S. and British governments and the Iraqi government. The hostages were taken from a building in the city of Baghdad on Monday night.

The U.S. and British governments had been in talks with the Iraqi government since Monday morning, when the hostages were taken. The negotiations were complicated by the fact that the Iraqi government had been demanding a large ransom for the hostages.

The diagram illustrates the experimental setup. A participant is seated at a table, looking at a screen. On the screen, there is a visual representation of a starting point (a large circle) and a target (a small circle). The participant's hand is positioned at the starting point on the table. The diagram shows the spatial relationship between the hand, the target, and the visual feedback provided on the screen. The screen also displays a scale or measurement system.

SEC okays foreign stock offering of Megaworld

Firm seeks to raise P4 BB in net proceeds

By Raymond Torres

MANILA, Philippines — The Securities and Exchange Commission (SEC) has approved the foreign stock offering of Megaworld Corporation, a move that could allow the real estate giant to raise up to P4 billion in net proceeds.

The SEC's approval, dated March 23, allows Megaworld to offer up to 10 million shares of its common stock in the United States. The offering is part of a larger plan to raise capital for the company's expansion into new markets.

Megaworld, which is listed on the Philippine Stock Exchange, has a long history of successful real estate projects. The company's CEO, Ramon Sison, stated that the offering is a significant milestone for Megaworld and will provide the company with the funds needed to pursue its growth strategy.

The offering is expected to be completed by the end of the year. Megaworld's stock is currently trading at a premium, reflecting the company's strong financial position and its potential for future growth.

Smoking ups risk of impotence

Mark is not at all surprised

Mark is not at all surprised by the results of the study. He has been a smoker for many years and has noticed a decline in his sexual health. He is currently considering quitting smoking and is looking for ways to improve his health.

Technically dead

The study found that smoking increases the risk of impotence. This is because smoking damages the blood vessels and reduces the flow of blood to the penis. This can lead to impotence, which is a condition where a man is unable to get or keep an erection.
